NACRS Pick-Lists

Canadian Emergency Department Diagnosis Shortlist (CED-DxS) v.4.0

5 additional codes have been added to the Canadian Emergency Department Diagnosis Shortlist (CED-DxS) in v.4.0, and the common terms for 9 codes have been modified. The CED-DxS is now a subset of 845 diagnoses derived from more than 17,000 ICD-10-CA codes to capture discharge diagnosis information on emergency department patients in Canada. The CED-DxS is used to capture the ED Discharge Diagnoses (data element 137).

The next version of ICD-10-CA will be released in early 2015. As a result, the CED-DxS has been updated to reflect changes in version 2015 of ICD-10-CA.

A table of revisions to the CED-DxS v.4.0 is included in Appendix A. These changes are effective April 1, 2015.

Presenting Complaint List (PCL) v.3.0

4 additional codes have been added to the Canadian Emergency Department Information System (CEDIS) Presenting Complaint List (PCL) in v.3.0, and descriptions for 6 codes have been modified. The PCL now contains approximately 170 patient complaints commonly seen in the emergency department. It provides a standardized list to capture patient reasons for seeking medical care. The CEDIS PCL is used to capture the NACRS Presenting Complaint List (data element 136).

A table of revisions to the PCL v.3.0 is included in Appendix B. These changes are effective April 1, 2015.
