

Dear emergency department staff or medical staff member,

Thank you for considering your participation in our research study titled “ED Interpretation Project,” regarding interpretation services in your emergency department. We invite you to participate in a brief anonymous online survey that should take around 5 minutes to complete.

Limited English proficiency has been shown to be a risk factor for poor health outcomes in the emergency department. Our study seeks to answer the question “what types of interpretation services are available in emergency departments across Canada to facilitate patient care?”

Our attached Consent Letter contains a brief overview of our study.

This study is being conducted by the Canadian Association of Emergency Physicians Antiracism and Anticolonialism Committee. We greatly appreciate your support in advancing equity in emergency medicine.

If you have read the Consent Letter and you are interested in participating in our study, please proceed to the survey here https://ubc.ca1.qualtrics.com/jfe/form/SV_ehcF8vCpSrH2ZSK.

Sincerely,

James Liu BSc MD CCFP(EM)
